

Environmental Policy

Basic Philosophy

The Komatsu Himi No. 1 and No. 2 Plants will further improve techniques cultivated through the development, production, and sale of cast iron and cast steel items, etc. and are committed to improving both environmental performance and economic efficiency. To this end, we proactively promote corporate activities while seeking to conserve the environment of the plant premises, local areas, and the planet, fulfilling our corporate social responsibility and contributing to the establishment of a society that enables sustainable growth.

Environmental Policy

1. Compliance with laws and regulations

We comply with laws and related agreements about the environment and work to prevent the pollution of the environment and preserve it in compliance with the Komatsu Earth and Environment Policy.

2. Promotion of continuous environment improvement activities

We set goals and promote continuous improvement activities that take due account of the impact of our business activities on the environment (environmental impact.)

3. Response to climate change

We promote climate change-aware activities, such as the reduction of electricity, fossil fuels, and greenhouse gas (e.g., CO₂) emissions.

4. Effective use of resources and promotion of recycling

We improve the efficiency of use of global resources (e.g. materials and water), promote reduction and recycling, and also strive to reduce, reuse, and recycle industrial waste into resources.

5. Prevention of air, water, and other environmental accidents and the management of chemical substances

We work to prevent environmental accidents such as air pollution, water contamination, and noise and vibration pollution as well as promote risk control and continuous reduction activities for chemical substances.

6. Environmental education and environmental communication

We promote environmental education and awareness activities for all employees working at Komatsu Himi No.1 and No.2 Plants on our environmental policies. We remain active in conserving biodiversity and the local environment, etc., and seek to enrich environmental communication.

7. Establishment of an environmental management system

We have established an environmental management system and are working to maintain and continuously improve our environmental activities.

◆ This environmental policy will be publicized outside the plant as needed.
