

Hiratsuka District Organization

Environmental Policy

1. Basic Philosophy

In compliance with the philosophy of the Komatsu Earth and Environment Policy, the Komatsu Hiratsuka District Organization (Shinomiya, Manda) contributes to the conservation of the global environment and to a sustainable society by reducing CO2 emissions through the hybridization and electrification of products using advanced technologies and by providing society with goods and services that are in harmony with nature through the development and production of equipment for the manufacturing of electronic components and semiconductors.

2. Environmental Policy

1. We will comply with laws, regulations and related agreements regarding environmental aspects, and work to prevent pollution and decrease the amount of energy used as well as the emission of greenhouse effect gases.
2. We will work to provide products take into consideration LCA (Life Cycle Assessment) and are easy on the environment, while also continually pursuing technological innovation.
3. We will promote activities to conserve resources (such as raw materials and water) while working to reduce industrial waste by recycling of resources as we continue to pursue our zero emissions goal.
4. We will establish and review the goals and purposes for improving the environment and engage in continual improvement activities.
5. While promoting the beautification of the organization, we will work to conduct business activities that are harmonious and cooperative with the local citizens.
6. We will engage in environmental activities that contribute to biodiversity.

This Environmental Policy will be made known to all employees who work within the organization as well as our distributors.
