

ISO14001 Komatsu Kanazawa Plant Environmental Policy

1. Corporate Principles

Komatsu Kanazawa Plant's philosophy is to further improve the technology, which has been cultivated through the development and production of large-sized construction equipment and industrial machines; to aggressively engage in business activities that consider the protection of the plant site land as well as the surrounding areas and the world; and to contribute to building a society where sustainable development is possible.

2. Guidelines for Corporate Activity

1. Because the Kanazawa Plant is located next to the ocean and the drainage water is directly connected to the sea, we will not only comply with the laws and regulations concerning the natural environment, but also lower the risk of abnormalities in water quality. In addition, we will work for continual improvement in environmental conservation, and for prevention of environmental pollution, as we follow the Komatsu Earth and Environment Policy
2. In our regular operations, we will take into consideration environmental impact, and set goals and targets to make continuous efforts to improve conditions of the natural environment.
3. We aim to be carbon neutral, with net zero CO₂ emissions, by 2050 and provide products, services, and solutions with a low environmental impact and excellent economic efficiency. We will also work to reduce energy usage, greenhouse gas emissions (such as CO₂ emissions), and freight-related CO₂ emissions by expanding the use of the Kanazawa Port.
4. We will reduce the amount of waste materials generated by our business activities and create a sound material-cycle society by effectively reusing waste materials.
5. We ensure the chemical materials used during our business activities are managed and strive to reduce their impact on the environment at our manufacturing sites.
6. We recognize biodiversity as one of the vital issues of the global environment and will make efforts to conserve the natural environment.
7. These policies will be made known to everyone who works at the Kanazawa Plant through education and awareness-building activities. This Environmental Policy will be made public when requested.

Hiroshi Shirato
Komatsu Kanazawa Plant Manager
