

Shiga Plant Environmental Policy

1. Basic Philosophy

We at the Komatsu Shiga Plant rank environmental conservation efforts as among the highest-priority management tasks. Furthermore, we contribute to people's health and the realization of a prosperous society by integrating advanced technologies into environmental conservation efforts in all our business activities.

2. Basic Policy

- 1) We set environmental goals in accordance with the Komatsu Earth and Environment Policy and Komatsu's environmental purposes and targets, review their adequacy annually, and work to continuously improve environmental conservation and prevent environmental pollution.
- 2) We promote energy-saving activities that align with the characteristics and scale of our products and services and their environmental impact, and we improve productivity and efficiency.
- 3) We engage in resource-saving activities as a means of protecting the environment and work to use resources effectively and reduce industrial waste generated.
- 4) We comply with environmental laws, agreements, and related requirements and fulfill our corporate social responsibility.
- 5) We thoroughly train all employees working at Komatsu Shiga Plant on this policy and disclose it widely to the public.

Tatsuya Nakaizumi
Shiga Plant Manager, Komatsu Ltd.
