## **Techno Center Environmental Policy**

### **Corporate Principles**

Based on the Komatsu Earth and Environment Policy, the Komatsu Techno Center shall fulfill its corporate social responsibility by improving its environmental and production performance in the use of completed machinery through our regular operations such as the development, production, and distribution of construction machinery.

### **Guidelines for Corporate Activity**

1. We will comply with laws and regulations relating to the environment and work on environmental conservation and preventing environmental pollution.
2. We will promote instruction in operating techniques that reduce CO<sub>2</sub> emissions from construction machinery.
3. We will actively participate in environmental conservation programs in local communities.
4. We will engage in environmental conservation programs that contribute to biodiversity.
